

# Great Grates

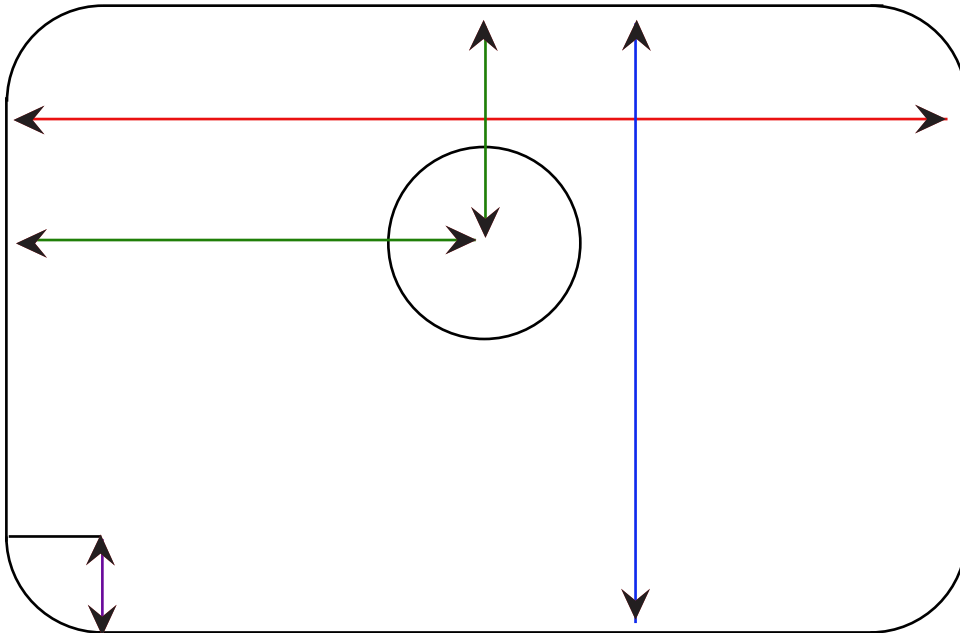

## Measuring your sink

**Note:**

**All measurements should be at inside bottom of sink after the radius.**

1. LENGTH: Measure from left to right at the absolute bottom of your sink. after the radius \_\_\_\_\_ "

2. WIDTH: measure bottom front to back after the radius . \_\_\_\_\_ "

3. DRAIN PLACEMENT: If your drain is absolute center skip this step. If not

Measure from the base at back of sink after the radius to the center of the drain. \_\_\_\_\_ "

If drain is off center left to right also measure from the left to center of drain. \_\_\_\_\_ "

4. CORNER RADIUS: Starting at the beginning of the curve create 2 straight lines from each side

measure from the start to the intersection of the 2 lines and that is your radius. \_\_\_\_\_ "

**Note: At least 1" should be deducted from your measurements to allow for bumpers.**

**Design:** Traxx - Dot - Silverware - Mosaic

**Material:** Stainless Steel - Bronze Finish

**Please note grates cut with incorrect measurements will be at your cost.**
